

POINT OF SALE

Streamline your Sales Counter

Intrust Win Point of Sale (POS) is an automated counter management system that combines a user-friendly interface with exceptional speed and flexibility. It is integrated with the Intrust Win Sales Order, Accounts Receivable, and Inventory applications to provide a fast, efficient means of entering sales and controlling inventory. Intrust Win POS operates as a cash register, offering far more capabilities than a traditional register and it's much easier to use.

Intrust Win POS is the perfect solution to improve the efficiency of your sales counter operation and the profitability of your business. POS will put the critical data that you need at your fingertips to quickly close sales and record the results of those sales for future decision making. You'll be able to capture complete transaction details at the "point of sale", transaction history and real-time database records are stored indefinitely, so your valuable data is always just a keystroke away.

To locate a customer or inventory item, simply key the first few letters or numbers of the name or item you are trying to locate. POS instantly brings you to the correct place in the list. Inventory items can also be located by scanning with a barcode reader or by keying in the description. Intrust Win POS also lets you look up your inventory items by typing the vendor SKU, product code, or a preferred name.

PS - Transactions

Customer ID: BETADYNA Beta Dynamics Inc. Transaction Type: Sale
