

Banking

The Intrust Win Banking application offers a total solution for secure, efficient electronic banking.

From ACH transactions to direct deposit of payroll checks, **Intrust Win** Banking provides a number of features that combine to offer you a secure electronic banking environment.

The Direct Deposit feature makes payday easier for everyone. Your employees can choose to have their paychecks deposited directly to their bank account, or may elect to receive a portion as a live check. They can also split deposit amounts between six different bank accounts in up to six different banks.

Automatic Clearing House (ACH) delivery of payments made to your vendors or received from your customers gives you the ability to transmit electronic payments to your bank using a standard, secure system that is both highly reliable and efficient. Intrust Win Banking also enables the payment of invoices by credit card.

Magnetic Ink Character Recognition (MICR) support allows you to print machine-readable information on the bottom of your checks for quick processing. You'll be able to securely generate checks while saving money by using blank check stock on a laser printer.

A fraud control and loss prevention measure, Positive Pay allows you to build a file (formatted to your bank's specifications) that can be transmitted to your bank for the authorization of check payments.

The Reconciliation Import in **Intrust Win** Banking enables you to use files downloaded from your bank to automatically clear transactions that have been processed by the bank, a great time-saver.

Direct Deposit Functionality in *Intrust Win*

- Vouchers replace a "live" check, ensuring that a pay check cannot be lost or stolen
- Deposits may be created by dollar amounts or percentages, and the information can be changed at any time once a test run or "prenote" has been approved by the bank
- Process multiple checks per employee in one Direct Deposit run
- Print checks and then print Direct Deposit vouchers for the checks being deposited
- The Edit Register shows how much of the net pay for each employee is on a check and how much is deposited
- Choose whether or not to use Direct Deposit when processing checks; if an employee is going on vacation and needs a check early, a normal paycheck can be prepared
- Multiple batch processing allows you to post multiple payrolls within a single day; a file will be created for each payroll batch
- The Check Register can be run and filed after checks are printed for a final audit trail
- Use the Direct Deposit File Creation Report to give you a breakdown of each employee's account

Note:

Direct Deposit requires *Intrust Win* Payroll. You will need a modem and communications software to transmit the Direct Deposit file to the bank.
