

EZ Route

Designed with the route salesperson in mind, EZ Route is a mobile order taking, inventory and invoicing program.

EZ Route allows your salespeople to use a hand held device to complete their transactions instead of using a bulky route book. Using bar codes to provide accuracy and the internet for transmission gives you better transaction turnaround and improved customer service.

EZ Route offers a variety of equipment options including Pocket PCs and laptops coupled with a solid user-friendly software platform that supports two sales modes:

- **Peddle Mode.** In Peddle mode you will transfer inventory to the vehicle, make your sale (invoice), and transfer left over products and/or returns back to the main warehouse.
 - Back office dispatcher route control
 - Inventory transfer to vehicle
 - Route suggestion
 - Order taking
 - Invoice printing
 - Transfer inventory back to the main warehouse

- **Pre-sell Mode.** In Pre-Sell mode, the salesperson is taking sales orders that will be delivered later. Typically, the salesperson does not carry inventory and doesn't need to physically go to the office or distribution point.
 - Route back office synchronization
 - Place sales orders
 - Check inventory availability
 - Receivables summary
 - Open new accounts

EZ Route can work off-line until it is time to transmit your data or to do inquiries. Because of its flexible architecture, you can connect to the server as follows:

- Wirelessly through an ISP
- Local Area Network (no need to cradle)
- Desktop (cradle to LAN)
- Modem using an ISP or Remote Access Service (RAS)
- Through an internet connected computer (cradle)

Functionality List:

- Route management
- Host system data replication (Synchronization)
- Order entry
- Transaction printing
- Host system order inquiry
- Sales templates
- Sales cards
- Customer inquiry
- Customer maintenance
- Accounts receivable inquiry
- Customer listing
- Customer price listing
- Inventory inquiry (on vehicle)
- Inventory inquiry (by warehouse)
- Inventory listing
- Inventory price listing
- On sale products
- Inventory Requisition
