Provides a graphical screen format	NO	NO	YES
Provides the foundation for new applications	YES	YES More extensively	YES There are a number of new applications already in place

Both Intrust V4.0 Windows or Intrust Win require new servers. If you need to replace your current server it is the optimum time to consider moving to either Intrust V4.0 Windows or Intrust Win. If you are not ready to make the move to Intrust Win but want to leave that as a future option then the best move on a new server is to Intrust V4.0 Windows.
